

Your local command center for everything you build with AI.

my-brain is a Claude Code & Cowork plugin that installs an always-on local dashboard for your Claude Code, Cowork & Cursor sessions — and a self-enriching second brain. **Fully local. No hooks. No telemetry. Zero dependencies.**

[+] Live monitoring	[\$] Token economics	[#] 4-way provenance
Sessions, sub-agents & tool calls with pass/fail — drill overview → session → step.	Tokens in/out, cache-hit %, top sessions, token-by-tool, cost-cutting tips.	Each tool call tagged internal / firm / external web / external LLM.
[~] Workflow brain	[>] ULTRACODE view	[*] Self-enriching feed
Force-directed workflow graph + a capability topology of skills & connectors.	Detects fan-out, tournament, loop-until-done & adversarial strategies.	Scheduled research loops keep a dated, cited AI digest flowing in.

Install in 30 seconds

```
/plugin marketplace add arkayaventure/my-brain
/plugin install my-brain@arkaya-plugins
/my-brain:setup-my-brain
```

Dashboard goes live at <http://127.0.0.1:7717/>

Secure by construction

- No hooks · no bundled MCP · no telemetry
- Binds 127.0.0.1 only (no network surface)
- Reads your files with your permissions
- Plain, auditable code — zero dependencies

Free for non-commercial · fair for business

Non-commercial (CC BY-NC 4.0)	Commercial	OEM / SaaS
Personal, research, evaluation, non-profit & OSS. Free forever, full features, attribution required.	For-profit teams, paid products, internal company use. Per-seat or site licence; optional attribution waiver.	Embed or resell in your product / hosted service. Redistribution rights; royalty or flat fee; custom terms.
